

Oussema Ben Ameer

Software / Backend Engineering Student

Tunis, Tunisia | +216 25 343 912 | oussema.benameur@etudiant-enit.utm.tn
[linkedin.com/in/oussema-benameur](https://www.linkedin.com/in/oussema-benameur) | github.com/oussema-code

Final-year computer engineering student seeking a **paid 4–6 month backend or software engineering internship from February 2027**. Hands-on experience building production backend features in ASP.NET Core and Spring Boot, including multi-tenant data architectures, CQRS pipelines, and tested REST APIs. Open to relocation across Europe and North America.

TECHNICAL SKILLS

Backend: C#, ASP.NET Core, Entity Framework Core, Java, Spring Boot, Python, Node.js, Express.js, REST APIs, JWT authentication, WebSocket/STOMP messaging

Data & Architecture: PostgreSQL, MongoDB, Redis, RabbitMQ, SQLite, Microservices, CQRS, Domain-Driven Design, Row-Level Security, unit/integration testing (JUnit, Mockito)

Frontend: React, TypeScript, Next.js

DevOps: Docker, Docker Compose, GitHub Actions, Azure Container Apps, Prometheus, Grafana, k6 | **Tools:** Git, Linux | **Networking:** TCP/IP, routing, switching, CCNA: Introduction to Networks

EXPERIENCE

Software Engineering Intern, Trace & Ace

Summer 2026 / 2 months

Multi-tenant ERP SaaS / ASP.NET Core, React, TypeScript, PostgreSQL

- Developed production features for a company-owned ERP covering ledger, inventory, sales, and payroll workflows.
- Built parts of a CQRS and domain-event architecture spanning 157 commands/queries, 42 events, and 17 handlers for accounting and operational workflows.
- Implemented PostgreSQL Row-Level Security across 39 tables using dual database roles and explicit EF Core transactions to preserve tenant isolation with connection pooling.
- Implemented FIFO and weighted-average costing, stock reservations, and backorder fulfillment logic.

Software Engineering Intern, IPS Group

Summer 2025 / 1 month

Procurement workflow application / React, Node.js, Express.js, SQLite

- Developed a three-tier web application that centralized purchase requests, suppliers, quotations, and purchase orders previously handled through paper forms and spreadsheets.
- Built role-based user and administrator dashboards, REST endpoints, supplier quotation comparison, and email notifications.
- Designed the relational data model for users, suppliers, requests, articles, quotations, and purchase orders.

SELECTED PROJECT

Collaborative Satellite Imagery & Urban Monitoring Platform

Nov 2025 – Apr 2026

Two-person ENIT project / Spring Boot, Next.js, Flask, FastAPI, Docker, Azure

- Co-developed four application services across Spring Boot, Flask, and FastAPI, communicating over REST and RabbitMQ.
- Validated the backend with 181 passing JUnit/Mockito tests and k6 load tests totaling 2,700 checks across 15 virtual users.
- Integrated JWT authentication and STOMP/WebSocket messaging for real-time project collaboration.
- Orchestrated a local integration stack with Docker Compose, MongoDB, Redis, RabbitMQ, Prometheus, and Grafana, and a GitHub Actions pipeline that built and deployed four Docker images to Azure Container Apps.

EDUCATION & CERTIFICATIONS

National Engineering School of Tunis (ENIT)

Sep 2024 – Present

National Diploma in Computer Engineering, Software Engineering track – Final year

Coursework: Software Architecture, Databases, Distributed Systems, Operating Systems, Computer Networks

Preparatory Institute for Engineering Studies of Sfax (IPEIS)

Sep 2022 – Jun 2024

Scientific Preparatory Classes, Physics and Technology track

Certifications: Cisco CCNA: Introduction to Networks; TOEIC English certificate (CEFR B2)

Languages: Arabic (native), French (C1), English (B2) | **Activity:** Securinets ENIT cybersecurity club member
